SCANNING AND PDF DOCUMENTS

FILE SIZE LIMITS AND GUIDELINES

Filing large documents in CM/ECF is time-consuming. Any attachment to a pleading should be filed as an attachment through CM/ECF. If you must file a large document, consider the following:

- **Check File Size:** Check the size of the scanned document before uploading it to CM/ECF. To check the file size, locate the file in Windows Explorer, right click on the file, and choose **Properties**. The Document Properties screen appears. On the Description tab, verify that the File Size is less than 10.0 MB (10 Megabytes).
- **Remember File Size Requirements:** No PDF can exceed 10 MB. The combination of all documents in a filing cannot exceed 20 MB. This will accommodate most word-processed documents. However, if a document is scanned, it may exceed the 20 MB limit. (*Hint:* Use 300dpi for scanning documents. Refer to our Helpful Tips document for more guidelines.) If a document does exceed the PDF size limit, the document must be split into smaller PDF files, each less than 10 MB. These additional parts may be filed as attachments to the main document.
- **Consider System Limitations When Uploading the File(s):** The total file size of a docket entry may be limited by the upload speed of your internet connection. As the total file size increases, the time it takes to upload the files also increases.
- **Important:** If your system “times out” while you are uploading PDFs into CM/ECF, you will need to break up your filing into more than one docket entry. You should use Exhibit(s) in Support of Document(s) (available in CIVIL and CRIMINAL) to file attachments beyond the file size limit
- **Any single filing transaction must be completed within one hour.** The clock starts when you complete the transaction commit screen, and click the ‘Next’ button. Since each additional attachment adds to the processing time, you are limited in how many documents you can attach to your main document.
- If a filing transaction "times out," you will get an error message:

An error has occurred while processing your request. Please click the back button of your browser and resubmit your request. Depending on the browser you are using, hitting the back button and resubmitting via re-selecting the ‘Next’ button may work. If this doesn't

work, start the filing process again with a reduced number of attachments.

Another message you may occasionally receive, after hitting the back button, and resubmitting the document by selecting the 'Next' button is

Warning: *The transaction you submitted has already been accepted and posted by this system. If your original submission contained an error, you must contact the court for further instructions on how to void it. If this submission was inadvertently submitted (clicking on the Next link on the previous page twice), you may find details about your original submission by viewing your transaction log.*

This message is telling you that the document has been successfully filed, despite the fact that you did not receive the normal notice at the end of your filing transaction. As usual, you will receive a Notice of Electronic Filing via email to confirm your e-filing transaction.

SIGNATURES: PRINTING PDF DOCUMENTS WITH SIGNATURE STAMPS

Signature stamps are used by the judges to sign documents in PDF format. In order to print a document with a signature stamp, a print setting must be changed. The first time you want to print a document with a signature stamp, follow the instructions below:

1. Choose **File . . . Print** from the drop down menu. The Print dialog box appears.
2. Toward the top right corner of the screen is a field labeled "Comments and Forms." Click the drop-down arrow for this field and select **Document and Stamps**.
3. Click **OK**. The document should now print with a visible signature stamp.

Note: Once you change this setting, all future documents will print with visible signature stamps.

HELPFUL TIPS

- If you use WordPerfect with Adobe Acrobat to create PDFs, use the File > Publish To PDF option.

- If you use Microsoft Word with Adobe Acrobat to create PDFs, use the File (or Office Button) > Save As > Adobe PDF option.
- If you are using a word processor program to convert to PDF, before printing to PDF, perform a “File/Save As” and save the document as a normal WordPerfect or MSWord document. This cleans up the document and gets rid of any embedded code that might be present, but not visible, before the document is converted to PDF.
- Be aware that when a document is converted to PDF, the pages may break at a different line, even if the document has been "cleaned up" and saved prior to the conversion. This may result in the PDF version of the document having more pages than the original version.
- Minimize the number of font styles used in the document. Try to avoid TrueType fonts when possible, as some tests have shown that these fonts drastically increase the size of the document.
- Use black ink, if possible. Blue ink and pencil do not scan well. If necessary, make a copy of the document before scanning it, and darken with the copy machine settings.
- Text documents are much smaller than imaged documents. This means that a document you convert to PDF using your word processor could be approximately 20% of the size of a scanned version of that same document.
- Try to title PDF documents off of the CM/ECF Menu, instead of using creative titles.
- Consider not converting your document to PDF until you have the final version—this helps you to avoid filing the wrong version.
- Use 300dpi for scanning documents.
- Set image type to black and white bitmap, text (image only), or line art
- Do not use OCR or Textbridge. For filing purposes only an image of the document is required.
- For large documents, where only the last page has a signature, consider converting the document to PDF using your word processor, and only scanning the signature page. Next, use your PDF creation program (e.g. Adobe Acrobat), to combine the two PDF files.

TROUBLESHOOTING

FILING ERRORS

Once a pleading or other paper is submitted and becomes part of the case, the CM/ECF System will not permit the filer to change the pleading or other paper or the docket entry. Filers should make every effort to ensure that:

- they do not file a pleading or paper other than the one intended to be filed,
- the pleading or paper is filed in the correct case, and
- the pleading or paper does not contain information that should have been filed under seal.

If a filing error occurs, the Clerk's Office should be immediately notified. The notifier should provide the Clerk's Office with the case number and docket number of the erroneous entry.

Note: The filer may file a motion to strike, but should not refile the document unless directed to do so.

TECHNICAL FAILURES: COURT'S SYSTEM VS EFILER'S SYSTEM

Court's CM/ECF System. A technical failure exists when the CM/ECF System is unable to accept filings continuously or intermittently over the course of any period of time greater than two (2) hours after 12:00 p.m. that day. (**Note:** A file-size limitation failure is not considered a technical failure.) Check the Court's website for postings regarding any scheduled or other CM/ECF System outages or downtimes. Should a filing be made untimely as the result of a technical failure of the Court's CM/ECF System, the filer may seek appropriate relief from the assigned judge.

Efiler's System. Problems on the filer's end, such as phone line problems, problems with the filer's Internet Service Provider (ISP), or hardware or software problems, will not constitute a technical failure under these procedures or excuse an untimely filing. Upon a showing of good cause, the assigned judge may grant appropriate relief for an untimely filing. Filers may, during regular business hours, scan and efile their document from the public scanning terminal located in the Clerk's Office.

PASSWORD SECURITY

Efilers agree to protect the security of their passwords and immediately notify the clerk if they learn that their password has been compromised. If a password is believed to be compromised, the registrant must immediately contact the court and change the Password using the CM/ECF System's Utilities feature.

Note: The View Transaction Log feature, selected from the Utilities menu, allows you to review all transactions that CM/ECF has processed with your login and password.

CONTACTING THE COURT

BEFORE YOU CALL

Before you call for assistance, please do the following:

- Review your data quality checklist.
- [Clear your cache](#) in your browser (i.e. delete temporary files, history, cookies, saved passwords etc.).
- Check the specific event instructions provided on our website
- Contact [PACER](#)

CONTACT INFORMATION

The Court can be contacted at the numbers or email below with questions or problems.

- **Phone:** (918) 684-7920 between 8:30 a.m. and 4:30 p.m. (CST).
- **Email:** CM-ECFIntake_OKED@oked.uscourts.gov
